

Endo Inc. Root Canal Specialists is taking part in Save Your Tooth Month, throughout May 2019. Save Your Tooth Month is a national effort to raise awareness of the role that endodontists play in dental health and to teach the public that modern root canal treatment can comfortably preserve your natural smile with virtually no pain. Endo Inc. Root Canal Specialists along with the American Association of Endodontists want to dispel the myths surrounding this dental treatment and encourage patients who need a root canal to see an endodontist.
