Why see an **endodontist**?

Experiencing tooth pain or told you need a root canal?
Here are **3 REASONS** to see an endodontist:

1

Endodontists have **2 to 3 years of advanced training** beyond dental school, and no one is better at saving your natural teeth.

2

Our teeth are a gateway to nutrition, a sign of emotion, and a signal of overall good health. **Our natural teeth are worth saving.** And no one is better equipped to do that than an endodontist.

3

Generally, endodontic treatment and restoration of the natural tooth is **less expensive** than the alternative of having the tooth extracted and replaced with an implant.
